

INDUSTRIAL CHEESE AND TOFU BLOCK CUTTING MACHINE

*The **Pneumatic Cheese and Tofu Block Cutting Machine** is designed for precise and uniform slicing of cheese in industrial settings. The machine is equipped with a feeding conveyor and a cutting system using stainless steel wires, ensuring high-quality cuts without damaging the product's structure. Its compact and ergonomic design allows seamless integration into cheese production lines.*

Technical Specifications:

Control Type: *Pneumatic*

Product Feeding:

- *Built-in feeding conveyor.*

Cutting System:

- *Cutting knives made of stainless steel wires (food-grade AISI 316).*
- *Adjustable wire spacing for custom slice thickness.*

Frame Material: *Stainless steel.*

Performance: *Depends on configuration and slice thickness requirements.*

- *Easy access for maintenance and cleaning.*

Safety:

- *Protective elements and sensors*
- *Compliance with food equipment safety standards.*

Application:

- *Use in dairy industry and production lines.*
